About Freezco

Salmon segment is the most important area of activity in our company. It is managed from direct purchase of raw material from farmers, through outsourcing of processing, to the sale of products on retail, food service or B2B markets. We currently produce approximately 1,700 tons of salmon products per year. White fish and seafood segment includes purchasing trade goods from Europe, Asia and America – the dominant role here is played by argentine hake, tilapia, alaska pollock and shrimps.

Quality

We prioritize product quality through long-term partnerships with our manufacturing facilities. Our dedicated production and quality departament carefully monitor production based on prepared specifications. We can offer products with the following certification: Global GAP, MSC, ASC, BIO and we operate in accordance with IFS Broker.

Flexible diversity

We can provide a wide range of products with various packaging options, customized to meet the needs and regulations of different markets; with low minimum order quantities (MOQ), while consistently creating new products and maintaining stable quality.

Customer-centricity

We prioritize being available to our customers whenever they need assistance, ensuring they receive prompt support and guidance.

Long-term pricing agreements

We offer products manufactured during the season and sold over the next 6-9 months. We store and finance the goods during this period, ensuring the customer receives them on schedule. We honor agreed-upon prices for deliveries even if market conditions have changed.

Collaborative problem-solving

We believe in resolving all issues and complaints together with our customers. We actively seek solutions that benefit both parties through a spirit of partnership and cooperation.

Transparency and precision

We prioritize transparency by providing carefully prepared specifications. Customers can trust that they will receive exactly the product that has been agreed upon.

Aquaculture & fishery certified products

Better Fish is a specialized brand, devoted to fish and seafood, which offers the widest range of certified aquaculture and fishery products in Poland. Better Fish products are made on the basis of raw materials originating from BIO or MSC (Marine Stewardship Council) certified sources.

High quality of products is guaranteed by certified raw material coming from verified suppliers as well as by efficient production process based on traditional solutions.

BIO certification guarantees a high level of quality of a product made without GMO and antibiotics. MSC standard proves that fish come from stable, well-managed fisheries. MSC certificate is an equivalent of BIO certificate for wild fish, not farmed.

Canned salmon is easy to use to create a variety of meals. You can mix it with mayonnaise as an alternative to tuna salad for quick lunches, salmon patties, green salad on sandwiches, pasta, and many other dishes. Canned salmon is a solution for a quick healthy meal or an idea for a base ingredient of a salad, appetizer or pasta.
